

**I Found You**

Miles of a pebble beach  
I wander with the wind  
A million rocks beneath my feet  
A million thoughts within  
A single stone caught my eye  
So warm and round and smooth  
I found you

A single drop of silver rain  
A single grain of sand  
Carried off upon the wind  
Or slipping through these hands  
Deep below the endless sea  
Across the desert blue  
I found you

Buried in the drifts of snow  
And in the fallen leaves  
Tiny perfect miracles  
That I will never see  
But in the turning of the roulette wheel  
That's spins the ball around  
I found you

I have wandered through these days  
And stumbled in the dark  
Feeling my way along  
By the beating of my heart  
With all that I could never know  
And all that I could lose  
I found you  
I found you
