

If You Loved Me

Did you know something was falling
Before it hit the ground
Feel it brush close to your face
Before you heard the sound
And did you see the smoke and
broken glass
And do all that you could

**If you loved me
Really loved me
I think that you would**

Did you hear me calling
Before we ran aground
See the tears left on the bed
Before you heard the sound
And tell me...
Did you want to touch my cheek
And say you understood

**If you loved me
Really loved me
I think that you would**

When all is said and done
At the end of the day
I was simply not the one
To make you feel that way
But love is only human
And a million shades of gray
I was simply not the one

Did you see the blazing sunset
Out across the waves
And did the scent of summer wind
Take your breath away
And tell me...
Did you think your heart might
break
With everything so good

**If you loved me
Really loved me
I think that you would**
